Experience

I can download it
or send it to
myself by email.

The module explains why
name and info is needed
for the resume (This is
very important, given
data-driven culture, the
module needs to build
trust with me the user)

Which school(s) did I go to?
What did I study and for how
long?

(Continued) Did I have any

If so, what?

What experience(s) did I have before work?
Did I volunteer somewhere?
If so, what did I do?

What are my goals?
What skills and abilities am I good at?
What are my interests?

What job(s) did I work
at? And for how long?
And what were my
duties?
